

PF Series Panels & Link Filters

Designed to replace pleated and/or fiberglass disposable filters.

PF Series Panels and Links are a two-ply filter, constructed from high quality dry polyester media. Media is heat sealed around a sturdy wire frame, creating a self-sealing gasket, which dramatically increases efficiency.

PRODUCT SPECIFICATIONS

- White, self-sealing, polyester media.
- Panels are heat-sealed around wire frame.
- Self-sealed panels eliminate air bypass.
- Unaffected by humidity, moisture, and most corrosive chemicals.
- Packaged to take up 50% less space as compared to standard cardboard framed filters.
- Available in Panels and Links.

BENEFITS

Economical

Versatile

Compact for
shipping & storage
